## INTRODUCTION

Over my career, with the support of great people, I helped breathe life into four successful products and companies for the military, manufacturing, facilities management and real estate industries.

- o From a 'blank sheet of paper' to widespread implementation.
- o Gathering a deep understanding of problems and needs,
- o Researching current conditions and technology,
- o Creating new concepts for integration and advancement,
- o Designing products for varying and future requirements,
- o Making marketing and development seamless,
- o Finding talent and resources for continuous improvement.

The results speak for themselves, all the products are still in use today continuing to provide value.

### CALL TO ACTION

### SEEKING CHALLENGING PROJECT OPPORTUNITIES

With my diverse and successful experience in engineering, design, programming, marketing, executive management and everything Internet, you'll find me uniquely qualified for the most challenging project assignments.

Previous clients and partners would probably say my ability to grasp the big picture" and provide "innovative solutions to perplexing problems" were the attributes they enjoyed most while working with me.

If you have a challenging project, please give me a call at 956-433-1783

## EDUCATION AND EXPERIENCE

1983

### OHIO STATE UNIVERSITY

BSEE Graduate

Electrical Engineering and Computer Science

First to use hand-held computers in class, by graduation half the engineering students were using them

1983-1987

### UNITED STATES AIR FORCE OFFICER

Electronic Security Command (ESC) HQ

Assigned to the new technology division. Held the highest security clearance in the nation.

We collected information electronically for strategic and tactical use in battlefield operations, and to support research and analysis by the U.S Intelligence community.

Awarded Medal for work as Project Manager of the tactical - intelligence interface system, mentioned by General Schwarzkopf as one of the most important weapon systems of the Persian Gulf War.

Project manager and designer of advanced military grade technologies.

Worldwide Implementations.

1987-1991

### PIC BUSINESS SYSTEMS

Partner and Product Designer / Developer

Open Source Technologies

Innovated retail to factory automation and set new industry benchmarks for make-to-order product turnaround reducing the time from weeks to days.

Designed algorithms that helped batch together custom work orders to maximize factory floor operations and reduce material waste.

Key customers included Hunter Douglas and Nanik Wood Blinds

**Stan Zwinggi**  
President

[picbusiness.com](http://picbusiness.com)  
(800) 742-7378

Sold partnership ownership in 1990 and self-funded the start-up of AEC Data Systems, later renamed AssetWorks.

1991-1998

### ASSETWORKS INC.

(formerly known as AEC Data Systems)

Founder, CEO and product designer of FM Enterprise.

Open Source Technologies, Oracle, IBM and Microsoft

Positioned company and product as a leading provider of facilities management software solutions throughout North America. Product designed for local, state, and federal government agencies, public utilities, K-12 school systems and higher education. We were one of the first companies in our area to leverage offshore resources from India, Russia, the Philippines and Mexico.

AssetWorks became a very successful company with an enviable customer base and industry leading product line.

Raised several rounds of venture capital and sold ownership in 1998

Key customers included NASA, US Army, NIH, Texas A&M University, UT, GTE, BellSouth, HP, Houston Metro, Halliburton and many more.

**Ken Slaughter**  
Senior Vice President
